

Portable professional-grade spray demonstration device

VISUAL & TACTILE

powerful demonstrations

Optional wind approximately 10 mph

Nozzle type: 5 position turret

Pressure: 0 - 150 PSI

Open flow to 1.4 GPM

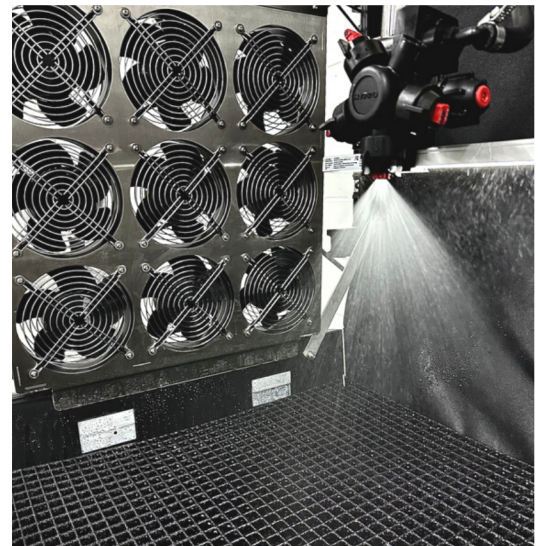

Infinitely adjustable nozzle height & angle

WHY DO YOU NEED ONE?

learning by doing

Replace boring, abstract talks with visual and tactile displays that everybody learns from. The most durable, easy-to-use spray table now with the addition of wind. A versatile and affordable tool for pesticide educators, crop consultants, or anyone involved in pesticide and drift education.

Empower your audience with the “why” behind the label recommendations for nozzle, boom height, wind speed and travel speed.

PORTABLE

Easily set up by one person in under 5 minutes. Self-contained design is quickly drained and winterized. Conveniently fits in truck/SUV.

EXPERTLY DESIGNED

Perfect for demonstrating adjuvants versus water, separate tanks are a standard design feature. Fits all standard nozzles.

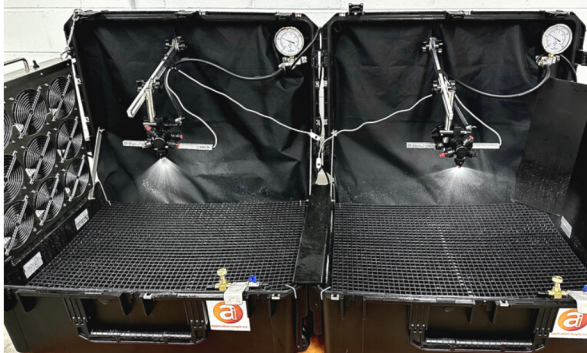

RELIABLE

Toughest packaging for heavy use. No batteries required! This unit needs just 110 Volts and comes equipped with GCFI for safe and easy use.

SPRAYTABLES.COM

3 configurations to fit your needs

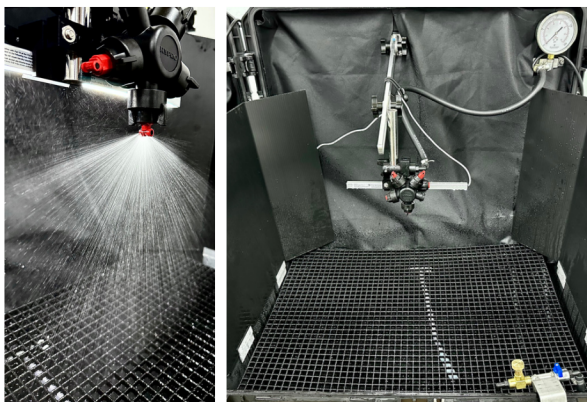

Breezy Spray Demonstrator

Fully-featured demonstrator with exclusive high-performance wind wall for extension educators. First spray demonstrator capable of meaningful demonstration of the effects of wind.

Dual Chamber Spray Table

Classic spray table with dual spray chambers for adjuvant comparison. Perfect for the ultimate professional offering multiple events daily who needs ruggedness and ease-of-use.

Single Chamber Spray Table

Single spray chamber without wind. Great for photography, or demonstrators who don't need to compare adjuvants. Second chamber can be added at any time if needs change.
